Fumes From Cleaning Solution at Manufacturing Facility

Ogden, UT - Just prior to 7:00 a.m. MTS, Pro Pac Labs Custom Manufacturing Facility was temporarily shut down for several hours when a water-bleach sanitizing solution came into contact with product residue and inadvertently released a strong Clorox odor. All affected personnel were immediately evacuated and eight people were treated for minor reactions to the vapors. Emergency personnel, in conjunction with HAZMAT support, ventilated the facility and evaluated plant air quality before releasing it back into operations at 9:45 a.m. MST. All affected personnel who were medically treated are anticipated for release and will return to work. Employees who were sent home have since returned to work. Pro Pac Labs is investigating this incident in cooperation with all safety and regulatory agencies.

Pro Pac Labs is a contract manufacturer of nutritional supplements and is committed to the highest standards of quality in every aspect of the manufacturing process. This core value has allowed the company to become a leading supplement manufacturer in the United States for almost 30 years.
